ABOUT INTERNATIONAL INDIAN PUBLIC SCHOOL

At International Indian Public School, we adopt an innovative pedagogy to nurture and develop each student's inherent potential. Our pedagogical activities are characterized by an integration of innovation and independent thinking – **the common goal being the formation of knowledge**. Our approach to curriculum is differentiated and challenging to enhance the vast and varied talents of our students. Our curriculum prepares students for academic, vocational, professional excellence and leadership, whilst encouraging individual development, happiness and success. The School is dedicated to provide quality education through qualified and dedicated faculty. It is committed to empower the teachers with the best available approaches to teaching. The School ensures that teachers have the requisite CBSE training for all subjects offered. The teacher plays the role of a facilitator who encourages collaborative learning and development of multiple skills through the generous use of resources.

VISION, MISSION, VALUES, FOCUS & APPROACH

Vision Statement

We envision taking the students on an insightful journey exploring the world of intellectual, emotional and social learning. Our purpose is to devise a model of academic excellence where uniqueness of each child is preserved. Value oriented teaching and community building are the core values of the institution.

OUR VALUES

COMMITMENT, ACCEPTANCE, RESPECT, EXCELLENCE, STRENGTH- CARES

Focus

To create a joyful learning atmosphere so that students can express themselves freely and explore their creative side to develop their personality.

Mission Statement

The Mission of International Indian Public School contributes to our vision that empowers the students to lead fulfilling lives by preparing lifelong learners and global citizens. The young minds are bestowed with individual academic, creative and sporting talents. The scholastic ethos encourages a questioning mind and helps build life skills of students. Honoring the diversity of communities, we imbibe Indian values in every child yet preparing them for international horizons. The school's commitment to have a warm student- teacher-parent connection is part of its founder's mission.

OUR ACADEMIC CULTURE

IIPS is dedicated to academic excellence and the development of self-confident individuals who are prepared to accept responsibilities inherent in personal freedom. The school implements its philosophy, knowledge, truth, wisdom nurtured by values, by stressing the fundamental value of integrity among its students. These aim to give purpose, a sense of belonging within the school, and allow our students to achieve individual and collective success. We strive to create a learning environment that is challenging, diverse and supportive, where talented, dedicated faculty and students are encouraged to interact in an atmosphere of mutual respect and trust.

Our Teaching Learning Approach

- Carefully planned curriculum based on each individual child's needs which includes:
- Emphasis on prior knowledge
- Stress on individual interests.
- Focus on individual learning styles.
- Identifying the abilities and skills of students helps them identify their future learning goals.
- Students and teachers construct learning pathways together based on two-way feedback conversations.
- Experiential learning as a way of life is not environment or curriculum specific.
- Teachers and students hold feedback conversations to discuss data and developmental needs and together they set goals. They discuss ways to reach those goals and the types of evidence that the students will need to produce.
- Scope and sequence need to be flexible.
- Teachers get to know students as “people” not just “students” and what their interests are.
- Children have choice in terms of regulating behavior, what/how to learn and how to present their learning.

OUR PEDAGOGICAL VISION

We personalize our students' learning to ensure that each student is met at their point of need and actively engaged in co-constructing their individual learning pathway. We pride ourselves on knowing our students as individuals and as learners. We use our knowledge of individual students' interests and their evidence of learning to create relevant and meaningful learning engagements.

Our students receive ongoing, specific, and meaningful feedback about their progress. They are self-reflective and participate in regular one-on-one conferencing with their teachers to discuss, refine and extend their learning goals. Teachers facilitate students' understanding of curriculum expectations by using whole school documentation that explains curriculum standards in language that can be easily understood by our students.

Our teachers work in collaboration to develop and implement an inquiry driven curriculum. Student grouping is flexible, enabling essential skills and knowledge to be explicitly taught at student's individual point of need.

Teachers share and refine their practice by learning and working in teams. They conduct Action Research relating specifically to the needs of the students whom they teach and provide each other with professional feedback outlining the best practices.

Mutually respectful working relationships exist between staff, parents and the broader community, focusing on supporting and extending student learning through providing opportunities for them to applying their skills and knowledge to real life experiences

VALUES AND BELIEFS ABOUT TEACHING AND LEARNING

Our purpose is to provide the best educational outcomes for every student in our school. Our school fraternity values a high standard of teaching and learning and believes there needs to be effective partnerships between staff, students and parents if children are to be creative thinkers, have the foundation for life-long learning and global citizenship. This means that school fraternity members must be respectful of each other and carry out the following broad aims:

3. PEDAGOGICAL STRATEGIES

3.1 Class-wise and Subject-wise: Art integration, innovative pedagogies, co-scholastic activities

SCC:

Have two sections Learners' A and Learners' B.

Mainstream teachers are not oriented to handle and accept the children with special needs in their regular classes. Hence, there should be counselling and orientation programs for the teachers of mainstream as well as parents. Why Parents? Because they need to ensure that they teach self-help skills to children and restrain the use of electronic devices.

4. SCHOOL ASSESSMENT POLICY

The Assessment policy has been formulated in close alignment with the CBSE board. The Board has always stressed that its students must acquire the skills of critical thinking, problem solving, analyzing information, collaboration, effective communication, developing curiosity and imagination as part of the learning process. It reflects the school's belief in conducting rigorous and fair assessment practices through reliable and valid assessment tools. It is intended to inform the school- teachers, students, parents and management about the conduct of all assessment procedures to achieve the objectives defined in the curriculum. By stressing high academic standards through a strong commitment to the process of learning; we at IIPS are considering assessment as an integral part of learning.

Assessment reflects upon the diverse aspects of the learning process-be it students' understanding,

knowledge and acquisition of skills or teaching strategies and learning outcomes set for a learning programme. Also, it is important to regularly report and record the assessment data to address the scope of improvement in learning and teaching at school.

PURPOSE OF ASSESSMENT

Assessment provides feedback to all stakeholders involved in the learning process:

- ◆ Feedback to students both in terms of their weaknesses and strengths during the course of learning as well as their achievement of the desired learning outcomes of the programme. This guides them towards steps for improvement as well as encourages them to set goals for the next stage of learning.
- ◆ Feedback to the teachers in terms of evaluating the learning outcomes and effectiveness of the teaching strategies. This guides them to review the curriculum, devise appropriate instructional strategies for better outcomes, and identify weak areas and specific needs of students to be able to guide them for improved performance.
- ◆ Feedback to the parents regarding the progress of their wards in different areas of learning.
- ◆ Feedback to the school management about the quality of curriculum, teachers and the learning environment. This helps them to plan effective pedagogical leadership and training, resource building and admission and language policies for further developmental plans.

ASSESSMENT TOOLS

In order to assess the wide range of learning traits expected to be evaluated in CBSE Examination and Internal assessments, the teachers at the school are expected to employ varied tools for both diagnostic as well as achievement reporting.

- ◆ It includes Multiple choice questions, unit tests/ Periodic tests, class and group discussions, debates, oral presentations, experiments, projects, research work, role plays, review worksheets, class tests, open book tests, quizzes, field visits, reflections, writing exercises, speaking tests, listening tests, term end examinations and any other method devised by the teachers.
- ◆ The aforementioned tools can be used appropriately for different subject requirements both for short tests as well as term examinations.
- ◆ Unit Tests/ Periodic Tests & Mid Term assessment for learning is designed by the subject teachers to identify the learning needs of students during the process. The aim of such assessments is to inform students of their strengths and weaknesses as a part of the course.
- ◆ The Annual assessment of learning scheduled at the end or is aimed to evaluate the students' level of achievement of the desired learning outcomes in the whole year.

Assessment for Grades IX - XII

- For classes IX – XII Three periodic tests, First Term and Annual Examinations will be conducted

There is an increased awareness among the educators of the need to integrate 21st Century skills in educational systems i.e. Learning Skills, Literacy Skills and Life Skills.

Learning skills include:

- Critical Thinking
- Creativity
- Communication
- Collaboration

Literacy skills include:

- Information literacy
- Media literacy
- Technology literacy

Life skills include:

- Flexibility
- Leadership
- Initiative
- Productivity
- Self-awareness

Major concern 7.4- REFERRAL PROCESS PRACTICED

STAGE 1: IDENTIFICATION

Teacher referral: Individual cases are observed and identified by teacher in classroom, with identification of students who are unable to cope academically or show behavioural problems.

Parent referral: Parents can directly refer the child for specific and academic behavioural problems during the PTM to the class teacher.

In both cases, the teacher will then inform and discuss with coordinator who will suggest and/or try classroom intervention or provide individual support to the students.

If required, the coordinator will further notify the counselor to observe the concerned child in the class followed by a one-on-one individual session with the counselor.

STAGE 2: DIAGNOSIS

After assessing the requirements of the child, the Counselor advises further action after consultation with the coordinator. Some standardized tests are conducted by the school counselor but for more complex tests, the counselor may refer to an external certified practitioner. In cases where the test is conducted by the school counselor, the test result is shared with the parent.

STAGE 3: SUPPORT

As per the advice of the counselor following the evaluation of the test reports, the following support can be provided.

Academic Support:

Reinforcement in few or all subjects to be provided. Extra classes are scheduled. Differentiated assessment support permissible by the board (such as, scribe/ extra classes/ extra time in school assessments etc) can be provided. Seek approval for support in the examinations held by the CBSE. Planning and developing individual education plans (IEP), as per the differentiated needs of the student.

Further support:

If the student requires further support beyond academic help specified earlier, the following provisions will be made available.

- An in-house Counselor is available during school hours.
- Aids such as hearing aids, magnifying aid, walking stick etc. are allowed.
- Teachers need to devise specific strategies to address CWSN within and outside the classrooms.
- Relaxation in terms of extension of time limits for submission of assignments is provided.
- Special arrangements are provided during the examinations to assist the students so that they do not suffer any disadvantage.
- Additional time for written examinations is also provided to those with reading, writing, visual and hearing disorders.
- The school shall arrange for a scribe, reader, prompter to assist such candidates during examination times.

RESPONSIBILITIES

Responsibilities of Supervisor:

- The supervisor oversees the day-to-day operations
- Ensuring there is a liaison with the parents and other professionals in respect of students with CWSN, both within and outside the school.
- Organising classroom provisions for all CWSN students.
- Supporting teachers with differentiation strategies.

Responsibilities of the Class Teacher:

- Identify the students with specific CWSN.
- Collaborate with the school counselor and other teachers to understand the needs of students.
- Devise strategies to meet differential learning needs of students in their classrooms. This can entail additional support classes, vocabulary support sheets, special seating arrangements etc., in collaboration with the grade-level coordinator.
- To help build the self-esteem and create a positive self-image of all students.

STAGE 3: SUPPORT

As per the advice of the counselor following the evaluation of the test reports, the following support can be provided.

Academic Support:

Reinforcement in few or all subjects to be provided. Extra classes are scheduled. Differentiated assessment support permissible by the board (such as, scribe/ extra time in school assessments etc) can be provided. Seek approval for support in the examinations held by the CBSE. Planning and developing Individual Education Plans (IEP), as per the differentiated needs of the student.

Further support:

If the student requires further support beyond academic help specified earlier, the following provisions will be made available.

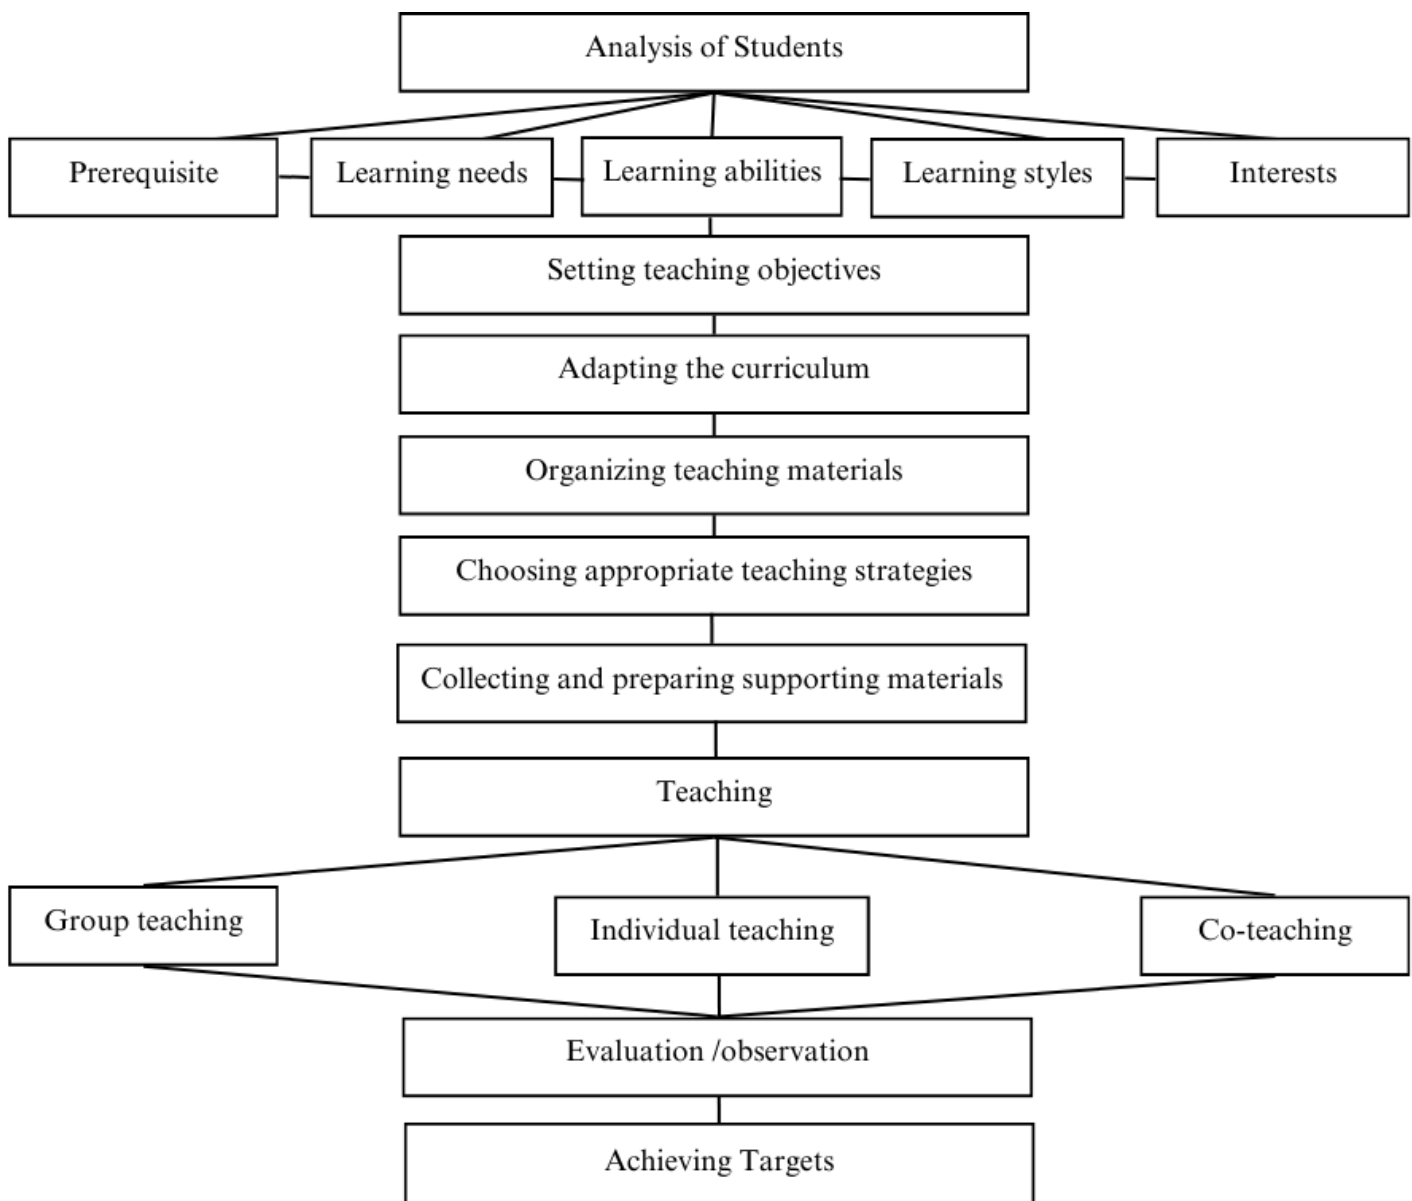

- An in-house Counselor is available during school hours.
- Teachers need to devise specific strategies to address CWSN within and outside the classrooms.
- Relaxation in terms of extension of time limits for submission of assignments is provided.
- Special arrangements are provided during the examinations to assist the students so that they do not suffer any disadvantage.
- Additional time for written examinations is also provided to those with reading, writing, visual and hearing disorders.
- The school shall arrange for a scribe, reader, prompter to assist such candidates during examination times.

Major Concern 7.5- Remedial Classes for slow learners

Each pupil is different in terms of learning ability, academic standards, classroom learning and academic performance and each has his own in learning. The aim of remedial classes is to provide learning support to pupils who lag far behind their counterparts in school performance. By adapting school curricula and teaching strategies, teachers provide learning activities and practical experiences to students according to their abilities and needs. They also design individualized educational programmes with intensive remedial support to help pupils consolidate their basic knowledge in different subjects, master the learning methods, strengthen their confidence and enhance the effectiveness of learning.

THE PROCESS OF REMEDIAL TEACHING

The flowchart below may serve as a reference for teachers in the delivery of collaborative teaching or individual teaching:

Major Concern 7.7- Community outreach Programme: Service beyond self

The Community Outreach Program in the school offers all students the opportunity to learn more about their community and to be of service to others both locally and globally. The school organizes various collection drives, awareness programmes, green environmental activities, cleanliness drives and skits to sensitize the community.

One of the main emphases of School community's outreach is service learning, in which outreach projects are integrated into the curriculum of all classes. As a part of the SEWA component, the students reach out to the local in the vicinity and also have developed strong connections with the Special Care Centre for specially abled children by volunteering there.

Guidelines for Implementation of the Annual Pedagogical Plan

- Ensure grade wise, subject wise and unit wise detailing of the innovative pedagogy to be used through preparation of structured lesson plans.
 - Develop content related to art and sport with education, with the help of concerned teachers as well as Art and Sports teachers.
 - Ensure dissemination of plan to all teachers and all concerned by June every year.
 - Ensure proper implementation of this plan.
 - Monitor the progress at least on a monthly basis.
 - Reach out to the Board for any training needs.
 - Maintain records of the preparation of the plan, and the progress in the implementation.

WHOLE SCHOOL RUBRIC

ELEMENTS		LEVEL 1	LEVEL 2	LEVEL 3	LEVEL 4
TEACHING & LEARNING	Personalized Learning	Knowledge and understanding of how students learn is demonstrated by a minority of teachers	Knowledge and understanding of how students learn is emergent in teacher practice. Individual and/or teams of teachers are planning new approaches to teaching and learning.	Knowledge and understanding of how students learn is demonstrated by the majority of teachers. Most teachers have developed and implemented practices that put students at the center of the learning process.	Knowledge and understanding of how students learn is evident in the practice of all teachers through a broad repertoire of student-centred teaching strategies and assessment methods
		Initial work is being undertaken to gather data on the individual learning styles of students at a year level	Data on the individual learning styles of students has been used to inform planning for the way in which teaching practices can be aligned to the learning needs and goals of individual students.	Pedagogical practice is informed by data and aligned to the learning needs and goals of individual students at certain year levels	Pedagogical practice is aligned to the learning needs and goals of individual students across the whole school
	Curriculum	Curriculum is usually designed by individual teachers based on the year level and associated subjects.	Teachers plan together to provide consistency of curriculum that reflects the stages of learning and student backgrounds and addresses the needs of particular cohorts of students.	Curriculum planning and practices reflects the achievements of students in relation to the standards for some domains, stages of learning and student backgrounds and perspectives.	All curriculum planning and practices analyses and addresses the full range of learning needs of individual students providing coherence, balance and continuity across all of the domains.
		Domains are connected in an ad hoc manner when planning learning experiences.	Domains are being combined when planning learning experiences for students.	Many of the domains are strategically integrated creating quality learning experiences for students.	All domains are interwoven in a sophisticated way in the design and delivery of a cohesive curriculum for all students.
		Curriculum planning and practice for cohorts of students is undertaken as something separated from System Frameworks and the School Strategic Plan.	Any discrepancies between current priorities in the School Strategic Plan and System Frameworks have been identified.	Whole school curriculum planning, and practice demonstrates the interconnectedness between the School Strategic Plan, System Frameworks and school improvement.	Whole school curriculum planning, and practice is based on the local context and interconnects with the School Strategic Plan and an agenda of continuous school improvement.
	Assessment	Students require structured support to develop the necessary knowledge and skills to manage and monitor their learning.	Teachers provide support for students to monitor and manage their learning.	Students have opportunities to monitor and manage their learning through structured support.	All students are equipped to monitor and manage their learning.
		Assessment for teaching (for, of and as learning) is not explicitly planned. Assessment of learning (summative) remains the focus.	Assessment for teaching (for, of and as learning) is being planned with a focus on identification of effective assessment strategies.	Assessment for teaching (for, of and as learning) is planned for at the whole school level and for cohorts of students using a range of data. Parents and students receive regular information on strengths and areas for improvement/future learning.	All teachers use assessment for teaching (for, of and as learning) to provide individualized learning. Learning portfolios enable ongoing information sharing between teachers, students and parents. Evidenced-based valid and consistent judgments are made through moderation.
	ORGANISATIONAL STRUCTURES	Current organizational structures all limit flexibility within student groupings and roles and responsibilities of teachers. Student learning and welfare are managed separately.	Current organizational structures are being examined and options are developed and analysed to identify structures that will better support student learning.	Flexible organisational structures are being implemented for aspects of the learning program and/or particular groups of students.	Organizational structures enable learning to happen in a range of places at a range of times through flexible use of people, IT and spaces.
		Learning spaces are confined to the classroom and there is limited use of ICT to support student learning.	A needs analysis informs future developments of physical and electronic learning environments.	Some spaces have been reorganised to create physical and electronic learning environments that support student learning.	All physical and electronic learning environments have been created that complement diverse student learning.
	PERFORMANCE & DEVELOPMENT	Professional learning is fragmented and usually short term.	Protocols have been established to increase the effectiveness of professional learning including the importance of reflection on practice.	Teams of teachers plan for learning opportunities that will meet their needs as a group.	Professional learning in collaborative teams focuses on exploration and sharing of learning and teaching practices to continually improve student learning.
		Professional learning focuses on individual teacher needs rather than agreed school priorities and processes.	School curriculum planning has begun to identify needs and processes for more effective professional learning within the school context.	A schedule of professional learning is established that best meets the needs of all teachers by focusing on their learning needs and grouping teachers accordingly.	The school fosters a culture that values and supports ongoing professional learning, risk taking and focused evaluation
